DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 2-8, 11-14, 22-25 and 31-33, drawn to an alignment system/table saw with an alignment system with a specific optical emitting device configuration, classified in class 362, subclass 259.
 - II. Claims 9, 20 and 34, drawn to an alignment system/table saw with an alignment system with electrical coupling, classified in class 439.
 - III. Claims 15-19 and 26-29, drawn to an alignment system/table saw with an alignment system with a specific support configuration, classified in class 362, subclass 285.
2. Claims 1, 10, 21 and 30 link(s) inventions I-III. The restriction requirement of the linked inventions is subject to the nonallowance of the linking claim(s), claims 1, 10, 21 and 30. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction

requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Subcombinations Useable Together

3. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Group I has separate utility such as without the electrical coupling of Group II. Conversely, the invention of Group II has separate utility such as without the specific optical emitting device configuration of Group I. See MPEP § 806.05(d).

4. Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Group I has separate utility such as without the specific support structure configuration of Group III.

Conversely, the invention of Group III has separate utility such as without the specific optical emitting device configuration of Group I. See MPEP § 806.05(d).

5. Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Group II has separate utility such as without the specific support structure configuration of Group III.

Art Unit: 3724

Conversely, the invention of Group III has separate utility such as without the electrical coupling of Group II. See MPEP § 806.05(d).

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Clark F. Dexter whose telephone number is (571)272-4505. The examiner can be reached Monday, Tuesday, Thursday and Friday during normal business hours.
